

# **VUZIX** **BLADE 2™**

Performance AR eyewear for the deskless workforce

Grab and go eye protection meets advanced waveguide technology

Mixed reality workplace solutions in a stylish design

Your hands-free, heads up connection to the metaverse

# VUZIX BLADE 2™

## Key Upgrades

- OS upgraded to Android 11 to support a huge variety of enterprise-focused apps. Allows for integration with MDMs, so security and management are simple.
- Integrated storage – No need to juggle SD cards with 40GB storage and streaming options.
- Added security features – Integrated storage means there's no longer risk of losing external data devices.
- Expanded Wi-Fi capabilities for diverse workplace environments – Added 5GHz bandwidth capability in addition to 2.4GHz. Highly flexible for diverse environments. Increased channels with 5GHz gives you better network access options.

## Key Differentiators

- The waveguide display features a movable 480x480 resolution eyebox and transparent display in ultra-bright 24-bit color.
- ANSI Z87.1 Eye protection with available prescription inserts
- Access real-time data, work instructions, mixed reality, HD photography and video streaming effortlessly
- Highly versatile inputs using touchpad or voice control
- Unrivaled connectivity options with Wi-Fi and multi-channel Bluetooth wireless

## Target Audiences
