The Vuzix Blade are the first Augmented Reality (AR) Smart Glasses featuring advanced waveguide optics for hands-free mobile computing & connectivity.

The Blade Upgraded Smart Glasses benefit from the same features as the regular Blade and now include an auto-focus 8-megapixel camera, built-in stereo speakers, and advanced Vuzix voice control. No BT headset is required. With these smart glasses, all users now also enjoy the extra peace of mind that comes with their ANSI Z87.1 certification. Prescription inserts are also optionally available for most required vision corrections.

The Blade Upgraded Smart Glasses is one of the first all self-contained augmented reality smart glasses available. The see-through Waveguide optics merge digital instructions onto real-world tasks, removing distractions, vision occlusion and thereby reducing error rates. At the same time, they wireless device is a complete AV communications tools for remote support applications. Blade Upgraded Smart Glasses safely enable remote operations while maintaining focus on your work and keeping eyes safely protected.

For Work and Prosumers

The Vuzix Blade are the first Augmented Reality (AR) Smart Glasses featuring advanced waveguide optics for hands-free mobile computing & connectivity.
